Contact Microsoft Support. Find solutions to common problems, or get help from a support agent.

With FedEx Tracking, you can easily manage all of your shipments with 24/7 access to essential online tracking information, documents, images and more.

But why are they ejected to form specifically a local Oort cloud instead of going interstellar and becoming vagabonds? Per multiple models, most comets did become vagabonds.

One type is diffuse nebulae, which are "clouds" of gas and dust in interstellar space, often many light years across. They include emission nebulae which are heated by stars and so emit

Find help and how-to articles for Windows operating systems. Get support for Windows and learn about installation, updates, privacy, security and more.

7 My supervisor told me that the UV photons emitted from AGN are heavily affected by ISM (dust extinction), but not X-rays, as described in Extinction - a powerful discriminator of dust size. Since X
