OverviewHistoryTelephonesInternetTelecommunications Development LevyFurther readingTelecommunications in New Zealand are fairly typical for an industrialised country. Fixed-line broadband and telephone services were largely provided through copper-based networks, but fibre-based services now represent the majority of connections. Spark New Zealand, One NZ, and 2degrees provide most services, while a number of smaller mobile virtual network operators also exist.

5G subscriptions, however, are estimated to increase at the fastest rate over the forecast period and are expected to account for about 47% of the total mobile subscriptions by the

El crecimiento del mercado de estaciones base inalámbricas 5G y 5G está impulsado por la creciente demanda
