Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to

The storage systems will be installed at CET Nord thermal power plant in Balti. The procurement aims to improve the reliability of Moldova's

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW.

Moldova has marked a historic milestone in its energy sector by deploying its first 25-megawatt (MW) battery energy storage system (BESS). This initiative represents a critical step

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID.

Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to strengthen the country's

Moldova will buy a Battery energy storing system (BESS) of the last generation, with a capacity of 75 MW, as well as internal combustion engines (ICE) with a capacity of 22 MW.

The Republic of Moldova will acquire a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW, along with Internal Combustion Engines (ICE) with a capacity of 22 MW.

The Republic of Moldova has taken another significant step toward strengthening its energy security by initiating the procurement of a state-of-the-art Battery Energy Storage System

Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE)

The storage systems will be installed at CET Nord thermal power plant in Balti. The procurement aims to improve the reliability of Moldova's grid, facilitate energy trade with neighboring
